DETAILED ACTION

1. Claims 1, 2, 7 and 8-14 are pending in the application, claims 3-6 having been canceled by applicants amendment filed 12/23/03. Claims 8-14 remain withdrawn from consideration as being drawn to nonelected inventions (see Office action dated 9/23/03).
2. Applicants' argument with regards to reference of the PCT application in the first sentence of the specification was found convincing.
3. Applicants have amended the claims (see amendment filed 2/23/03) and have also filed an information disclosure statement (IDS) listing a number of references that are pertinent to the presently claimed invention. The GB 97070 reference listed on the said IDS appears to be the closest prior art of record (as it relates to the newly amended claims) and hence a new ground of rejection has been issued for the present claims utilizing the GB 97070 reference only.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Henkel and Cie G.M.B.H. (Henkel) {GB 970790}.

Henkel discloses the presently claimed carrier-containing catalyst, which contains cobalt on activated carbon or alumina (see Table 3). Henkel also discloses a

process for producing a catalyst comprising a step of causing cobalt to be carried on a carrier (kieselguhr) to thereby produce a carrier carrying the cobalt followed by a step of hydrogenating (reducing) the cobalt on the carrier (see the preparation of the catalyst on page 3).

Response to Arguments

Applicants' arguments, filed 12/23/03, have been considered but are moot in view of the new ground(s) of rejection.

Since applicants seem to take issue with the fact that they use the presently claim catalyst to treat an epoxy alcohol, represented by formula (I) of the present claim 1, so as to produce a both end-hydroxyl group-terminated diol, the Examiner would like to bring to applicants' attention that the present claims are directed to product claims (catalyst claims) and process of producing the said product. Thus, the additional language of the claims, wherein the catalyst is used to produce a both end-hydroxyl group-terminated diol from an epoxy alcohol, has not been afforded any patentable weight.

Applicants' submission of an amendment and an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 12/23/03 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 609(B)(2)(i). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
